

Webber Electronics

Webber Electronics Power Cords and Cordsets are designed for use in both consumer and industrial applications. Our power cords are ideal for computers, appliances, medical devices, business machines, power tools and other instrumentation and communication equipment.

Our broad offering of International and North American power cords includes cords in both standard and custom configurations. We offer same day shipments from one of our regional distribution centers.

Webber Electronics stocks many standard items for immediate delivery. We also offer very low minimum buys on custom power cords at competitive prices. Webber Electronics remains very flexible in designing stocking agreements to meet our customer's delivery requirements.

Webber is dedicated to supplying high quality power cords for all global power cord applications. We currently supply our products to many Fortune 500 world class companies.

Our primary manufacturing facility is ISO9002 certified.

Quality Standards

Webber Electronics is dedicated to providing high quality power cords and related accessories. Our primary manufacturing facility is ISO9002 certified. Our factories are vertically integrated - controlling the manufacturing process from the actual drawing of copper wire, cabling & shielding, insulating of conductors and jackets, and final molding and assembly. By controlling this process from start to finish we have accomplished an excellent quality performance record.

All Webber products are approved by the applicable approval agencies such as UL, CSA, C-UL, VDE, PSE, JET, BSI and other international approval agencies.

Customer Service

First rate customer service is the standard at Webber Electronics. We strive to provide immediate replies to all your engineering, delivery, and pricing inquiries. Our 2 regional U.S. distribution centers allow us to provide quick same-day shipments on orders for standard stock items received by 3pm Eastern time. We also provide Just-In-Time or Kan-Ban delivery programs for many of our customers.
